Overall Task Management
Uriel Cohen
This document is a joint product of the Center for Architecture and Urban Planning Research, University of Wisconsin-Milwaukee (UWM), and the Community Design Center, Inc. of Milwaukee (CDC). The document was prepared as part of Task III, Criteria and Literature Search and Analysis, of Contract No. DACA73-78-C-0005 between the U.S. Department of the Army, Office of the Chief of Engineers, and CDC, Inc. and its subcontractor, UWM.

The planning and design criteria were prepared and written by Uriel Cohen, Ann B. Hill, Carol G. Lane, Tim McGinty, and Gary T. Moore.

The overall goal of the Environments for Play and Child Care Project is to develop a new design guide and technical manual for the planning and design of child support facilities and outdoor play areas on U.S. Army bases around the country. The current task is a part of that overall objective. This document is one of several interim reports.
